KAMAL ALI

Seeking a full-time role starting May 2023

EDUCATION

Memorial University of Newfoundland, Canada

B. Eng. Computer Engineering | Class of 2023 | GPA 3.92/4

EXPERIENCE

DevOps Intern

Nuance | Montreal | Sep 2022 - Present

- Automating documentation pages using GitLab CI & Jinja
- Migrating the automation of documentation to Azure DevOps using Python, Terraform, & shell scripts

Azure | Python | CI/CD

Cloud Automation Software Developer

Verafin | St. John's | Jan 2022 - Apr 2022

- Deployed new lambda microservices to AWS using Terraform
- Implemented a high throughput pipeline using lambdas and queues for a job acknowledgement system

AWS | Java | Terraform

Junior Programmer Analyst Intern

InnovMarine | Remote | May 2021 - Aug 2021

- Reduced the runtime of a VBA app from 90 minutes to 5 minutes, resulting in significant savings in time and money
- Established a git workflow to incorporate Pull Requests and more frequent commits

VBA | Python | Git | Documentation

Hardware Support Intern

Nokia | Ottawa | Jan 2020 - Apr 2020

- Conducted signal integrity tests using oscilloscopes and spectrum analyzers on routers for data centers
- Debugged hardware issues and reworked 0402 components

Soldering | Schematics | Linux | Firmware

Research and Design Intern

Memorial University | St. John's | Jun 2019 - Aug 2019

- Performed heat analysis & designed, conducted, and documented 20 de-icing experiments in 6 weeks

Calculus | Scientific Method | Design

STUDENT COMMUNITIES

Co-founder / Community Manager

MUN Coders Community | May 2022- Present

- Prepared content and moderated coding meetups. link
- Managing the Discord community and the Marathon initiative

Founder / Lead Organizer

Hack Frost NL | Oct 2020 - March 2022

- Founded the university's first large-scale hackathon. link
- Built the team and led the planning for the first two hackathons
- Managed the team growth and recruitment efforts

Junior Designer

Paradigm Hyperloop | Oct 2018 - Oct 2020

- Participated in SpaceX Hyperloop Competition in Los Angeles
- Developed and documented Python scripts to automate tasks using SciPy and Google Drive API

SKILLS

- **Languages**: Proficient in C++, Java, Python, and VBA. Familiar with C# and Ruby
- Quantum Computing: actively learning, familiar with Pennylane and Qiskit
- Clean coding and documentation skills
- Working experience with AWS and Terraform
- Solid understanding of web technologies
- Confident presentation skills
- Strong initiative and always seeking improvement
- Actively developing my leadership skills
- To-the-point, honest feedback

PROJECTS / HACKATHONS

- **Hacktoberfest:** contributed to PennyLane 0.27
- **McGill AI Hackathon 2022:** worked with new team on a lecture transcription & summary app using Cohere API, came in 2nd place. link
- **Microsoft Hackathon 2022:** Provided feedback on assignments for an edX Purdue quantum course that uses Azure Quantum Workspaces
- **Bounce Health Hackathon 2022:** pitched a real-time app connecting specialists to rural physicians, came in 2nd place.
- **U-Calendar (Jan-Apr 2021):** Desktop calendar for university students using Java & SQLite. link
- **IEEE Xtreme:** Jumped from 1243rd in 2019 to 530th in 2021. link
- **Killick-1 Ground Station:** leading my capstone team to ensure satellite communication with the ground (rotator, protocols, dashboards). link

READINGS / ONLINE COURSES

- **Xanadu Quantum Codebook**
  Sep 2022 - Present | Self-study
- **Programming Quantum Computers (2019)**
  Jan 2022- Aug2022 | Self-reading
- **Intro to Quantum Computing**
  Sep 2020 - Dec 2020 | The Coding School
