KAMAL ALI

Actively seeking winter 2022 software internships (January to April)

EDUCATION

Memorial University of Newfoundland, Canada

B. Eng. Computer Engineering | Class of 2023 | GPA 3.89/4

EXPERIENCE

Junior Programmer Analyst Intern

InnovMarine | Remote | May 2021 - Aug 2021

- Improved, maintained, and documented a VBA application
- Optimized the application to run +20 times faster, resulting in significant savings in time and money
- Established a git workflow to leverage Merge Requests and more frequent commits with VBA
- Improved a Python tool to automate reading/writing VBA into Excel
- Planned and managed sprints on GitLab

VBA | Python | Git | Documentation

Hardware Support Intern

Nokia | Ottawa | Jan 2020 - Apr 2020

- Conducted signal integrity tests using oscilloscopes and spectrum analyzers on routers
- Debugged hardware issues and reworked 0402 components
- Developed a Perl script to automate searching the result files

Soldering | Schematics | Linux | Firmware

Research and Design Intern

Memorial University | St. John's | Jun 2019 - Aug 2019

- Performed heat analysis on a prototype and researched materials to provide design recommendations
- Characterized a product's properties by designing, conducting, and documenting 20 experiments in 6 weeks

Calculus | Scientific Method | Design

EXTRA-CURRICULARS

Student Advisor

Google Developers Student Club | Jul 2021- Present

- Assisting the launch of the first Google Developers Club at MUN

Lead Organizer

Hack Frost NL | Oct 2020 - Present

- Founded the university's first large-scale hackathon. link
- Built a team, led the planning, and raised funds
- Managing team growth and planning for the next hackathon

Junior Designer

Paradigm Hyperloop | Oct 2018 - Oct 2020

- Participated in SpaceX Hyperloop Competition in Los Angeles
- Developed and documented Python scripts to automate tasks using Google Drive API (learned Git in the process)

SKILLS

- Languages: Proficient in C++, Java, Python, and VBA. Familiar with C# and Perl
- Clean coding and documentation skills
- Solid understanding of AWS basics and serverless
- Good understanding of React, HTML, CSS, & JS
- Familiar with REST APIs
- Strong presentation skills
- Proactive and self-directed
- Actively developing my leadership skills
- To-the-point feedback

PROJECTS / HACKATHONS

- **U-Calendar** (Jan-Apr 2021): Desktop calendar for university students. Technologies used: Java, JavaFX, SQLite, CSS, Maven, UML, & Git. Link
- **MakeUofT 2020**: Basketball game with Ultrasound sensors and Arduino. Link
- **IEEE Xtreme Programming 2019**: 24 hour programming competition. Finished top 33%. Link
- **Entrepreneurial Externship 2019**: interned at a company to discover potential startup ideas. Developed and pitched an idea in 4 weeks.

AWARDS RECEIVED

- Memorial's Engineering Dean's List (x2)
- MUN International Undergraduate Scholarship
- Emera Excellence Scholarship
- ESANA Undergraduate Excellence Scholarship
- MUN International Entrance Scholarship

ONLINE COURSES

- AWS Certified Developer Associate | Jul 2021 - Oct 2021 | Udemy
- Intro to Quantum Computing | Sep 2020 - Dec 2020 | The Coding School
