KAMAL ALI

Seeking a full-time software developer role starting May 2023

EDUCATION

Memorial University of Newfoundland, Canada

B. Eng. Computer Engineering | Class of 2023 | GPA 3.92/4

EXPERIENCE

DevOps Developer Intern

Nuance (Microsoft) | Montreal | Sep 2022 - Dec 2022

- Led the migration of automated documentation to Azure DevOps using Python, Terraform, & internal Microsoft tools
- Automated documentation pages using GitLab CI & Jinja

Azure | Python | CI/CD

Cloud Automation Software Developer Intern

Verafin | St. John's | Jan 2022 - Apr 2022

- Deployed new lambda microservices to AWS using Terraform
- Implemented a high throughput pipeline using lambdas and queues for a job acknowledgement system

AWS | Java | Terraform

Junior Programmer Analyst Intern

InnovMarine | Remote | May 2021 - Aug 2021

- Optimized an algorithm in VBA to reduce the runtime from 90 to 5 minutes, saving significant time and money
- Established a git workflow to incorporate Pull Requests and more frequent commits

VBA | Python | Git | Documentation

Hardware Support Intern

Nokia | Ottawa | Jan 2020 - Apr 2020

- Conducted signal integrity tests using oscilloscopes and spectrum analyzers on routers for data centers
- Debugged hardware issues and reworked 0402 components

Soldering | Schematics | Linux | Firmware

STUDENT COMMUNITIES

Co-founder / Community Manager

MUN Coders Community | May 2022- Present

- Prepared content and moderated coding meetups. link to tutorial
- Managing the Discord community and the Marathon initiative

Founder / Organizer

Hack Frost NL | Oct 2020 - Present

- Founded the university's first large-scale hackathon. link
- Built the team and led the planning for the first two hackathons
- Currently advising and assisting with third hackathon

Vice Chair

IEEE Student Branch | Oct 2020 - Present

- Organizing technical talks and non-technical student gatherings
- Applying for grants to supply the Branch with new equipment

PROJECTS / HACKATHONS

- **Open Source:** contributed to PennyLane 0.27
- **McGill AI Hackathon 2022:** worked with new team on a lecture transcription & summary app using Cohere API, came in 2nd place. link
- **Killick-1 Ground Station:** leading my capstone team to ensure satellite communication with the ground (rotator, protocols, dashboards). link
- **Microsoft Internal Hackathon 2022:** Provided feedback on assignments for a quantum course that uses Azure Quantum Workspaces
- **Bounce Health Hackathon 2022:** pitched a real-time app connecting specialists to rural physicians, came in 2nd place.
- **U-Calendar (March 2021):** Desktop calendar for university students using Java & SQLite. link
- **IEEE Xtreme:** Jumped from 1243rd world ranking in 2019 to 530th in 2021. link

SKILLS

- **Languages**: Proficient in Java and Python (work), and C++ (courses). Familiar with C# and Ruby
- Clean coding and documentation skills
- Practical experience with AWS and Terraform
- Quantum Computing: actively learning, familiar with Pennylane and Qiskit
- Solid understanding of web technologies
- Confident presentation skills (Received Work Term Presentation Award)
- Strong initiative and life-long learner
- To-the-point, honest feedback

READINGS / ONLINE COURSES

- **Atomic Habits**
  Nov 2022 - Present | Self-reading
- **Xanadu Quantum Codebook**
  Sep 2022 - Present | Self-study
- **Programming Quantum Computers (2019)**
  Jan 2022- Aug2022 | Self-reading
- **AWS Certified Developer Associate**
  Jun 2021 - Aug 2021 | Udemy
